EXPERIENCE

Product Designer (Independent)

July 2024 – Present

Temple · health & wellness grocery app

Suwanee, GA

- Owned product design end to end for a 0-to-1 health-tech app, balancing user needs, technical feasibility, and business tradeoffs from concept through beta launch.
- Designed the core experience (onboarding, dietary and allergen preferences, in-aisle scanner results) alongside a reusable UI kit and design system, while making scoping calls on which features could ship reliably.
- Selected and integrated a third-party nutrition data API for catalog growth after evaluating tradeoffs against an alternative data source.
- Partnered directly with a 15-person beta cohort to prioritize design and product decisions, translating usability findings into roadmap changes.
- Designed and iterated the beta and waitlist landing pages, using PostHog analytics and user feedback to improve the sign-up funnel.
- Ran Lighthouse accessibility audits against the app and addressed the flagged issues to improve WCAG compliance ahead of launch.

User Experience Design Intern

May 2025 – July 2025

Nooon

Remote

- Redesigned the company website end to end, creating Figma prototypes, wireframes, and UX copy to improve usability and user flow.
- Led a full rebrand (logo, typography, color palette) to elevate the company's visual identity and online presence.
- Built and maintained the site in WordPress (Elementor, Blocksy), balancing design intent with technical and business constraints.

PROJECTS

FundFlow | B2B SaaS Loan Management Web App

Nov. 2024 – Dec. 2024

- Interviewed small business owners and translated findings into product requirements and high-fidelity Figma prototypes with a 4-person team.
- Prioritized and scoped the Dashboard and Financial Tools features based on stakeholder input and technical constraints.

XpensePal | B2C Personal Finance Mobile App

Aug. 2024 – Aug. 2024

- Designed an end-to-end mobile app prototype for Gen Y and Z, covering research, wireframes, and high-fidelity prototypes.
- Defined and prioritized core features (expense tracking, savings goals, debt repayment) based on research findings and product tradeoffs.

EDUCATION

Arizona State University

Tempe, AZ

Bachelor of Science in Graphic Information Technology, Full-Stack Web Development

March 2020 – May 2024

Google

UX Design Professional Certificate

Aug. 2024

SKILLS

Product & UX Design: UX/UI design, wireframing, prototyping, interaction design, information architecture, design systems, responsive design

Product Thinking: Scoping and prioritization, vendor/API evaluation, roadmap input, product analytics, go-to-market collaboration

Research: User interviews, usability testing, competitive analysis, WCAG-compliant design

Tools: Figma (incl. Figma AI), PostHog, Jira, Adobe Creative Suite, HTML/CSS, JavaScript, WordPress

AI-Assisted Workflow: ChatGPT/Claude for research synthesis
